

## 5 Oceans Fund

30 June 2021

### Performance Commentary

The 5 Oceans Fund was up 0.60% over the month of June.

The global equities strategies, Acadian and Schroder, both had solid months, up 4.2% and 1.2% respectively. These are unhedged returns and were helped by the NZD weakening versus the USD, the currency hedges in place tempered part of this return, contributing -0.6%. Our local strategies were also positive contributors, with the unconstrained Ranger up 1.5% while the more NZX focused Trans-Tasman was up 2.4%.

The bond strategies were mixed for the month, with Daintree and the direct bond holdings both up 0.1%, while T Rowe Price was down 1.3%. The Kohinoor tail risk strategies were also down for the month, with the Core fund returning -6.0% (in USD) and the Pacific fund -1.2% (in AUD).

### Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.
