

## 5 Oceans Fund

30 June 2022

### Performance Commentary

The 5 Oceans Fund was down 2.31% in June.

Global equity markets had a volatile month, Acadian was down 0.9% and Schrodgers was down 5.8% (in AUD). Though these are unhedged returns and the hedges in place detracted 0.1%. Our local strategies suffered as well, with the unconstrained Ranger down 10.6% and the more NZX focused Trans-Tasman down 5.6%.

The bond funds had mixed returns, T Rowe Price was up 1.3% (in AUD) and Daintree was down 0.5%. The direct mortgage loans contributed positively and New Zealand Emissions Units (carbon credits) were down 1.1%. The Kohinoor Core tail risk strategy reacted to the market turmoil and was up 14.7% (in USD).

### Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

### Performance to 30 June 2022 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Past 5 Years (p.a.)	Since Inception (p.a.)*
