

5 Oceans Fund

30 November 2020

Performance Commentary

The 5 Oceans Fund had a record month in November, up 3.98%.

Our local growth strategies, the Ranger and Trans-Tasman Funds, were strong contributors, both up over 9%. Global assets also helped out, with the bounce back in value helping Schroder, up 16.4% (in AUD). Acadian was flat. Both Acadian and Schroder are unhedged and their returns were dampened by the strong NZD, but that meant the currency hedging in place contributed 1.2%.

The bond strategies contributed positively. Daintree was up 0.7%, T Rowe Price was up 0.3% and the direct bond holdings were up 0.1%, whilst AMP was down 0.3%. With a strong month for growth assets, and the US election over (sort of!), volatility subsided and the Kohinoor tail risk strategies were down, returning -14% (in USD) and -8% (in AUD) for the Core and Pacific strategies respectively.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 30 November 2020 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
