

5 Oceans Fund

30 November 2021

Performance Commentary

The 5 Oceans Fund was down 0.62% over the month of November.

In the global equity strategies, Acadian was up 3.9% while Schroder was down 0.5% (in AUD). These are unhedged returns and Acadian in particular was helped by the NZD weakening versus the USD. The portfolio currency hedges in place tempered some of these gains and detracted 0.6% this month. Our local strategies were both down, with the unconstrained Ranger down 3.3% while the more NZX focused Trans-Tasman was down 2.6%.

The bond funds were both down, with Daintree down 0.13% and T Rowe Price down 0.8% (in AUD). However, the direct bond holdings were up 0.3% and the mortgage loans also contributed positively. New Zealand Emissions Units (carbon credits) have been added into the fund and were flat for the month, while the Kohinoor tail risk strategies were mixed - the Core fund was down 0.2% (in USD) and the Pacific fund was up 4.1% (in AUD).

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 30 November 2021 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Past 5 Years (p.a.)	Since Inception (p.a.)*
