

5 Oceans Fund

31 August 2020

Performance Commentary

The 5 Oceans Fund was up 2.4% in August.

August was a very good month for markets and the 5 Oceans Fund. The local funds were again the main contributors, with the Ranger Fund up 9.6% and the Trans-Tasman Fund up 4.9%. The global equity strategies also provided good returns with Acadian up 0.7% (in NZD) and Schroder up 2.6% (in AUD). Both Acadian and Schroder are unhedged returns, the currency hedging in was a minor headwind contributing -0.1%.

The bond strategies also contributed positively, with the direct bond holdings up 0.4%, AMP up 0.5%, T. Rowe Price flat (in AUD), and Daintree up 0.3%. Normally volatility falls when equity markets are rising but August bucked this trend. As a result the Kohinoor tail risk strategies were up as well, returning 1.4% (in USD) and 0.3% (in AUD) for the Core and Pacific strategies respectively.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 31 August 2020 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
5 Oceans Fund	2.42%	4.22%	7.16%	6.06%	6.84%
