

5 Oceans Fund

April 2020

Performance Commentary

The 5 Oceans Fund was down 1.16% in March. The COVID-19 concerns that impacted equity markets globally in February continued in March as markets sold off viciously followed by a bit of a rebound towards month end.

Locally, the Ranger Fund was down 10% and the Trans-Tasman Fund was down 14.8%. The global equity strategies were also materially impacted, with Acadian down 7.8% (in NZD) while Schroder was down 18.7% (in AUD) as value stocks got hit particularly hard. Both Acadian and Schroder are unhedged returns and the currency hedging in place was also a material negative contributor for the month as there was a material flight to US dollars.

The bond strategies generally did a good job in preserving capital, AMP and the direct holdings were down 0.2%, Daintree was down 2.2% whilst T. Rowe Price was up 2.0% (in AUD). The Kohinoor tail risk strategies did the heavy lifting in March as equity volatility in particular hit high levels. The Core and Pacific funds were both up over 70%.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 31 March 2020 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
5 Oceans Fund	-1.16%	-4.72%	0.60%	3.88%	4.70%
