

5 Oceans Fund

February 2020

Performance Commentary

The 5 Oceans Fund was down 1.03% in January. Overall it was a disappointing start to the year with mixed performance amongst the managers.

Locally, the Ranger Fund was down 3.6% whilst the Trans-Tasman Fund was up 1.5%. The global equity strategies were also mixed, with Acadian up 4.5% (in NZD) while Schroder was down 3.3% (in AUD). Both Acadian and Schroder are unhedged returns and the currency hedging in place was a material negative contributor for the month as the USD strengthened versus the NZD.

The bond strategies were slightly negative overall, with AMP up 0.5%, Daintree up 0.7%, direct holdings up 0.5% and T. Rowe Price down 1.6% (in AUD). The Kohinoor tail risk strategies were slight positive contributors as volatility picked up due the coronavirus uncertainty. The Core and Pacific funds returned +3.2% and +4.5% respectively.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 31 January 2020 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
5 Oceans Fund	-1.03%	-0.12%	5.55%	5.98%	6.17%
