

## 5 Oceans Fund

January 2020

### Performance Commentary

The 5 Oceans Fund was up 0.43% in December. Overall it was a solid month to end the year, although there were quite differing results at the underlying strategy level.

Locally, the Ranger Fund was down 0.7% whilst the Trans-Tasman Fund was up 0.3%. The global equity strategies were also mixed, with Acadian down 2.6% (in NZD) and Schroder up 1.8% (in AUD). Both Acadian and Schroder are unhedged returns and the currency hedging in place was a material positive contributor for the month.

The bond strategies were positive overall, with AMP down 0.2% and Daintree flat. Pleasingly though, T.Rowe Price was up 2.0% (in AUD), after what had been a disappointing 2019. The Kohinoor tail risk strategies were relatively subdued with the Core and Pacific funds returning +0.3% and -1.6% respectively.

### Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

### Performance to 31 December 2019 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
5 Oceans Fund	0.43%	0.89%	8.35%	6.87%	6.68%
