

## 5 Oceans Fund

June 2019

### Performance Commentary

The 5 Oceans Fund was down 0.29% in May.

The growth orientated strategies had mixed results for the month. The local-focused Ranger fund was down 0.5%, while the Trans-Tasman fund was up 0.7%. The global equity strategies were similar with the Schroders value-focused strategy down 4.8% (in AUD) which was inline with markets, while Acadian returned a very respectable 0.3%. Both Acadian and Schroders are unhedged returns and the currency hedging in place was a negative contributor as the NZD weakened significantly.

Bond managers had a strong month as yields fell, with AMP up 0.8% and Daintree up 0.4%, while T. Rowe Price was up 2.3% (in AUD). With the equity declines and increased volatility, the Kohinoor tail risk strategies were up 5% and 7% for their Core and Pacific funds respectively.

### Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the Fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The Fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the Fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.
