

5 Oceans Fund

March 2019

Performance Commentary

The 5 Oceans Fund was up 1.25% in February.

The growth orientated strategies continued the strong run from the start of the year. The local focused Ranger fund was up 2.1%, and the Trans-Tasman fund was up 4.7%. The global equity strategies followed suit, with Acadian up 3.3% and the Schroders value focused strategy up 6.6%. Both Acadian and Schroders are unhedged returns and the currency hedging in place was a modest detractor over the month.

Bond managers had mixed results reflecting their differing approaches, with AMP up 0.3%, and Daintree up 0.4%, while T. Rowe Price was down 0.2% (in AUD). As expected, the Kohinoor tail risk strategies continued to decline as volatility receded and equities gained, down 4-5% for both their Pacific and Core funds.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the Fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The Fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the Fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.
