

5 Oceans Fund

March 2020

Performance Commentary

The 5 Oceans Fund was down 2.57% in February. Coronavirus concerns hit equity markets locally and globally.

Locally, the Ranger Fund was down 4.9% and the Trans-Tasman Fund was down 4.4%. The global equity strategies were also impacted, with Acadian down 4.5% (in NZD) while Schroder was down 7.9% (in AUD). Both Acadian and Schroder are unhedged returns and the currency hedging in place was a material negative contributor for the month as the NZD weakened versus many currencies.

The bond strategies contributed positively, with AMP up 0.6%, Daintree and the direct holdings flat, and T. Rowe Price up 2.0% (in AUD). The Kohinoor tail risk strategies kicked in as expected due to the price falls and pick up in volatility. The Core and Pacific funds returned +30% and +27% respectively.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.

Performance to 29 February 2020 (net of fees)

	Past Month	Past Quarter	Past Year	Past 3 Years (p.a.)	Since Inception (p.a.)*
5 Oceans Fund	-2.57%	-3.16%	1.56%	4.63%	5.19%
