

5 Oceans Fund

May 2018

Performance Commentary

The 5 Oceans Fund was up 0.20% in April as markets bounced back from losses in March.

The Australasian focused Ranger Fund had a benign month, down 0.1%. The global Acadian Fund was up 2.7% (in unhedged terms) though the currency hedging in place tempered some of these gains as the NZ dollar weakened.

The bond managers both delivered positive returns, with AMP up 0.16% and Kapstream up 0.20% (in AUD).

Volatility calmed sharply, which led to Kohinoor being down 8.2% for the month.

Fund Strategy

The 5 Oceans Fund is designed to have a diversified asset and geographic exposure. The exposure to growth assets can be varied between 30% and 70% of the Fund depending on the underlying managers' assessment of market risk. This is quite different from traditional diversified funds which often target a set growth allocation and invest accordingly.

The Fund achieves this by carefully selecting managers that have flexible investment mandates and/or employ risk mitigation strategies. This gives the Fund a dynamic and flexible exposure to growth assets and greater focus on capital protection in the event of market crashes.
