

Ranger Fund

December 2018

Performance Commentary

The Ranger Fund was down 0.26% in November.

Equity performance continued to be weak as several companies suffered negative announcements in nervy markets. This time it was the turn of Boom Logistics, Redbubble and Australian Vintage to suffer from negative news. Boom Logistics announced an employee dispute and strike action in New South Wales which has subsequently been resolved. Redbubble's Thanksgiving trading results appear to have been weaker than market expectations but it continues to grow strongly. Australian Vintage's outlook statement at its AGM appears to have been less bullish than the market was anticipating, partly due to frost issues. In our opinion, this is all very short-term and has no impact on our long-term investment thesis for these companies, in some cases creating great buying opportunities.

Afterpay and Corporate Travel did feature on the positive side of the ledger this month as their prices started to recover from the impact of the previous month's negative news.

Fund Strategy

The investment strategy of the Fund is to exploit market inefficiencies resulting from a bias to short term performance by financial market investors, through investing in a range of Australasian assets. Castle Point has broad discretion on the type and proportion of Australasian assets the Fund invests into. Given the broad investment mandate of the Fund there is no target asset allocation or investment mix. There are some restrictions and investment limits on certain assets. Refer to the Fund's current statement of investment policy and objectives.
