

Ranger Fund

September 2018

Performance Commentary

The Ranger Fund was up 3.06% in August.

Reporting season was in full swing during August, with most companies held by the fund releasing full or half year results. As indicated by the solid return for the month, none of the companies held by the fund produced a negative surprise.

Afterpay was again the standout. Its expansion into the USA has begun strongly and it has acquired a UK business that will allow it to roll out in that market before the end of the year. The market had a positive response to these developments, with the stock price up 49% for the month.

Fund Strategy

The investment strategy of the Fund is to exploit market inefficiencies resulting from a bias to short term performance by financial market investors, through investing in a range of Australasian assets. Castle Point has broad discretion on the type and proportion of Australasian assets the Fund invests into. Given the broad investment mandate of the Fund there is no target asset allocation or investment mix. There are some restrictions and investment limits on certain assets. Refer to the Fund's current statement of investment policy and objectives.
